

# Eastern Africa

**Eastern Africa** (*Sudan, Ethiopia, Kenya, Eritrea and others*)

– **Chair: Daniel Danano (TerrAfrica) and Mahamane Larwanou (Facilitator)** (Room C05)

Concept title: Improvement of agro-sylvo-pastoral system

Outcome: improved agro-sylvo-pastoral system

3 objectives

**Objective 1:** to holistically assess the resources and practices that support the above production system

- **Activities**

- 1.1. Identify and select the most appropriate tools for assessing the resources and practices

- 1.2. Assess the status and extent of the resources in the systems.

- 1.3. Evaluate the existing resource management practices and approaches

## **Objective 2:** to determine measures to enhance agriculture (including forests and trees) and livestock production

- 2.1. evaluate and validate the already existing systems with the aim to enhancing productivity
- 2.2. develop integrated agro-sylvo-pastoral systems that enhance productivity, water use efficiency, nutrient and carbon cycling and biodiversity conservation.
- 2.3. identify and develop the value chain and market opportunities for various products and services
- 2.4. identify bottlenecks and opportunities in policies, governance and incentive measures addressing integrated resource management

**Objective 3:** to build the capacity for scaling up of the best practices and farming systems at landscape level

- 3.1. assess capacity building needs for various stakeholders
- 3.2. develop training modules and processes for the various stakeholders

# Available resources

- Partnership with relevant stakeholders: African Union, EU, development partners, FAO, UNEP, AFF, MDG, ICRAF, GEF, AGRA, etc...
- Gaps: finances and technical assistance to prepare and support the whole process.
